Experience

| Full Stack Developer | ImmiFy | September 2023 – present

Working as the co-founder and full stack developer on legal-tech startup. Developed the backend with Postgres, Typescript in Node.js, and Zod to build a REST API. Currently developing the front end with Typescript in React, Zustand, and Material UI.

| Private GitHub available for review upon request

| Full Stack Developer | The Collab Lab | July 2023 – September 2023

3-month Apprenticeship: Worked on a Firebase backend and developed the frontend with React and Tailwind with a team of 4 developers and 3 mentors to develop a smart shopping list application that tracks a user's shopping habits.

| Digital Media Fellow | Yale University | August 2016 – May 2019

Worked on motion capture technologies and immersive user interfaces at the Center for Collaborative Arts and Media (CCAM), Yale's media laboratory.

| Architect | GOA Architects | May 2018 – Sep 2018

In collaboration with UN Environment and UN-Habitat, I was part of the design team to build the "ELM", an adaptable, off-grid house prototype that was exhibited at the UN Headquarters in New York, using next-gen green technology.

| Project Manager & Design Strategy | May 2019 – August 2021

Before my career shift to tech, I had worked as a project manager and architect in a wide range of projects, leading design and construction across the US in various firms. This experience has given me proficiency in systems design, creative problem-solving and project execution.

Education

Yale University

Master of Architecture
2016–2019

Tehran University

B.Sc. in Civil Engineering
2010–2015

Skills

Programming Languages

JavaScript, Typescript, SQL, HTML, CSS
